Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1- 15, drawn to a process for forming a strippable glass fiber wall covering, classified in class 442, subclass 59.
 - II. Claims 16 - 17, drawn to a strippable glass fiber wall covering, classified in class 427, subclass various.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as dip coating.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Robert Touslee on March 7, 2003 a provisional election was made without traverse to prosecute the invention of Group II, claims 16 - 17 .

Affirmation of this election must be made by applicant in replying to this Office action. Claims 1- 15 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. Claims 16 and 17 are indefinite because they are dependent on a non-elected claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 16 – 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Murch (U.S. 3,934,066).

Murch is directed to a fire-retardant, intumescent laminate system which is highly suitable as a flexible wall covering (column 11, lines 54 – 60).

Murch teaches a laminate as shown in Figure 2. Murch teaches that the laminate comprises an intumescent sheet 11, protective layer 12 and adhesive layer 13. The intumescent sheet comprises a porous sheet material, such as glass cloth (column 4, lines 30 – 35), which is impregnated with an intumescent composition (column 3, lines 48 – 68). The protective layer is

equated to the Applicant's "first dried coating". The adhesive layer is equated to the Applicant's "second dried coating". The adhesive layer can comprise thermoplastic or thermosets and may be pressure-sensitive (column 9, lines 32 – 40). The laminate can be removed from any surface due to the nature of the adhesive material. The process for forming the stripping glass fiber wall covering as described in claim 1 from which claims 16 and 17 depend is not found to be patentably limiting, because the process used to form the product does not impact the final product.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer A Boyd whose telephone number is 703-305-7082. The examiner can normally be reached on Monday thru Friday (8:30am - 6:00pm).
